

Alfred (Al) Slover, Jr.

Technical Assistance Specialist/Circuit Rider

Mr. Slover began employment with North Carolina Rural Water Association (NCRWA) on September 9th, 2009 as a Technical Assistance Specialist/Circuit Rider for water systems across the state.

Prior to joining NCRWA, he served in multiple capacities within local governments, public utilities, and the private sector.

Mr. Slover's public works career began with the City of Carrollton, Texas where he worked for 19 years and quickly climbed through the ranks. Relocation to North Carolina brought him and his family closer to aging parents and to where he accepted the positions of Director of Public Utilities for Stanly County and later the Director of Public Works for the Town of Mount Pleasant.

He also worked for a private engineering firm where he oversaw municipal construction activities. During that tenure he was responsible for the construction of water systems, wastewater systems, treatment plants, lift stations, elevated storage tanks, and municipal buildings.

Currently Mr. Slover holds licenses and certifications in multiple states which include Water Treatment, Water Distribution, Wastewater Collection, and Backflow/Cross Connection.

He is extremely excited about joining NCRWA and looks forward to meeting and working with ya'all ---- so call him and as he put it, "Let's Get To Work".
