

Marcus Harper

Circuit Rider

My background since attending two years at Isothermal Community College has primarily been surface water treatment in a plant setting. I started as a trainee in 1997 and since then have worked on the east and western side of NC. I started with NCRWA July of 2009 and prior to that I was the back-up ORC for a wastewater treatment plant in Rutherfordton NC for United Water.

My current licenses held are A-surface, Grade II Biological and Physical/Chemical 1. I hope to visit all water professionals and assist where needed in Western NC.
