To Whom It May Concern:

Market Day has been using the services of the Burlington Medical Center and Dr. Evans for more than eight years. The Burlington Medical Center performs all of our pre-employment drug screens, random drug screens, and DOT physicals. Furthermore, if an associate is injured on the job, the associate is sent to the Burlington Medical Center for treatment.

During the past eight years, Dr Evans and his staff have truly been a pleasure to work with and have been flexible in an effort to accommodate our needs. They are professional, efficient, and helpful. They are always willing to take the extra time needed to answer questions. In addition, I truly believe that, regardless of the purpose of the visit, an individual is given a thorough examination and Dr. Evans places the individual's health as his top priority. A perfect example is an incident that occurred in December of 2007. I had sent an associate to Burlington Medical Center for his scheduled DOT physical. During the exam, Dr. Evans found an abnormality in the individual's abdomen and suggested very strongly that our associate go to his family doctor for a follow up exam. Our associate did as Dr Evans suggested. His doctor sent him for an MRI and a large aneurism was found on the aorta artery in his abdomen. Our associate was immediately sent to the hospital and had surgery. The surgeon stated to our associate that "whoever found the problem saved your life."

Burlington Medical Center is a "top notch" facility that has a professional and caring staff. It has been our consistent experience that Dr. Evans is our employees' "family doctor." Consequently, I recommend Burlington Medical Center.

Sincerely,

Ron Ostrowski
