TRANSPORTATION, INC.®

NEW CENTURY TRANSPORTATION

New Century has worked with Burlington Medical Center since 2000. In 2003, I came on board from another transportation company where I dealt with BMC for about 10 years before that; so my total experience with Burlington Medical Center goes back more than 15 years.

BMC has always been extremely dependable and accommodating whether responding to an on-the-job injury or handling an expedited physical and drug test. They are really serious about what they do. The real value we have found is that they always provide appropriate care that gets our injured employees back to work fast, and eliminates fraudulent claims or costly, unnecessary rehab or P.T. that drags on too long.

As a result, many of our employees have chosen the Burlington Medical Center as their Primary Care Provider. It's a great compliment to their dedicated, accommodating staff. They truly are capable of handling all the medical requirements our company and employees need.

The bottom line is: Burlington Medical Center helps us control our workers' compensation cost by minimizing days away from the job as a result of an on-the-job injury. I would recommend BMC to anyone who wants to reduce workers' compensation insurance dollars or partner with a qualified provider for DOT physicals and substance abuse testing services including drug screens and program administration.
